

Persitus RU™

Effective and economical choice for diabetes control.

Insulin glargine 100 UI/ml in reusable pens with 5 dedicated cartridges.

Persitus is indicated for treatment of diabetes both types 1 and 2. Persitus provides a steady level of Insulin in the body for an entire 24 hours by once-daily shots only!⁽¹⁾

Persitus RU™ is presented in reusable pens for the first time in Iran.

Reusable pens have many benefits.

Some of its benefits are⁽²⁾:

- **Durability:** no need for large space to store, which was required for disposable insulin pens!
- **Accuracy:** the reusable insulin pens are more accurate in terms of fulfilling the dosage accuracy according to international standards (ISO-11608-1)
- **Easier application:** audible, visual and tactile feedback during dosage dialing to support easy application and may reduce the chances of human errors during handling!
- **Cost-effectiveness:** more cost-effective
- **Environment - friendly:** reusable insulin pens are environmental friendly that could provide ecological advantage in terms of contributing to less plastic waste, compared to disposable pens.
